Preface

This bulletin presents information on anticipated bargaining activity in private industry and in State and local government in 1994. The information in the tables—identified by employer and union—relates only to major bargaining agreements (those covering 1,000 workers or more) which expire or are subject to reopening during the year. Tables in this bulletin are based on data available to the Bureau as of September 30, 1993. Thus, the data presented here for 1994 are subject to revision if:

- Any contracts set to expire in 1994 are renegotiated in the fourth quarter of 1993, or;
- Any agreements concluded during the fourth quarter of 1993 provide for a contract reopening in 1994,or;
- If agreements set to expire in 1994 with a reopener in the fourth quarter of 1993 are concluded during the quarter.

Data summarized in the text are not strictly comparable with those found in tables 1 through 4 because text data include some agreements covering fewer than 1,000 workers. Industry codes for private sector agreements listed in the tables are BLS-specific codes and, except for the State and local government codes, conform to Standard Industrial Classification codes.

The information in this bulletin was assembled by the Bureau of Labor Statistics from files it maintains of major agreements in all industries except railroads and airlines (contracts for which are on file with the National Mediation Board). The Bureau's file is open to the public, except for a few confidential agreements.

This bulletin was prepared by Joan Borum and Michael Cimini of the Division of Developments in Labor-Management Relations, phone (202) 606-6275, and Les Chappel of the Division of Directly-Collected Periodic Surveys. Material in this publication is in the public domain and, with appropriate credit, may be used without permission. Sensory impaired individuals may obtain information in this publication upon request. Voice phone: (202) 606-STAT; TDD phone (202) 606-5897; TDD message referral phone: 1-800-326-2577.

Collective Bargaining Activity in 1994

Major collective bargaining agreements covering 2.1 million private industry and State and local government workers are scheduled to expire or reopen in 1994. The workers account for just over one-fourth of the 8.2 million workers under all major agreements (those covering 1,000 workers or more), the smallest proportion since the series began in 1985.

In private industry, contract expirations and reopenings will affect 1.4 million of the 5.5 million workers covered by major agreements. Nearly two-thirds of these workers are in nonmanufacturing industries, with major concentrations in transportation (258,000 workers), construction (254,000 workers), and retail trade (162,000 workers). In manufacturing, 491,000 workers will have their contracts

renegotiated, chiefly in the apparel (129,000 workers), electronic and other electric equipment (96,000 workers), and food and kindred products (61,000 workers) industries.

In State and local governments, contracts for 764,000 of the 2.7 million workers under major agreements will expire or be reopened in 1994. In local governments, bargaining activity will involve some 497,000 workers, 28 percent of whom are employed in three school districts (Los Angeles, Detroit, and Philadelphia) and the New York City Transit Authority. In State governments, negotiations will occur for 267,000 workers; more than nine-tenths of these are employed in Florida, Illinois, Ohio, Michigan, and Connecticut.
